**Please Note:**

**Equipment Check:** With this many entrants the organizing committee has decided to do the equipment check by class (DDX, DD, NDD). This will avoid chaos of 19 dogs trying to harness and hitch simultaneously. Equipment Check will start with the DDX class, then DD, then NDD. A steward will be onsite to direct entrants when to begin to line up with your dog for equipment check.

**Potty Area:** The vast majority of the property will be used for various parts of the Draft Tests. Signs will be posted to direct entrants where they can safely potty their dogs during the day. Please pay attention and ask where it is safe to potty your dogs when you arrive and check in with the Test Secretary. We do not want any teams accidentally contaminating the freight hauls or backpacking courses.

**Parking:** When entrants arrive you can drive up to the house to check-in with the Test Secretary, unload your equipment, kennel, etc. and set up for the day. Parking will be further down the driveway and a steward will direct you where to park once you arrive.

**Kenneling:** There will be a covered walkway available for entrants to kennel their dogs, and some space inside the garage. Teams can work out of their vehicle but please note vehicles will be parked further down along the driveway, requiring significant back and forth walking if you plan to do this.

**Load:** On test day, a designated time will be allotted for teams to practice with the load prior to their freight haul.

**Washrooms:** Entrants will have access to an onsite portable washroom
